

Imperial buys stake in MiX Telematics

IMPERIAL Holdings has bought a 25.4 percent stake in vehicle tracker MiX Telematics.

Imperial says the deal will enhance the relationship it already has with MiX Telematics, whose operations also include fleet management. MiX Telematics already provides services to Imperial's new and used vehicle dealerships.

"Several of MiX's other products in the fleet management arena may also find applications in the Imperial group," Imperial said.
