

ABOUT MIX TELEMATICS

Founded in 1995, MiX Telematics is a global provider of vehicle tracking and fleet management products and services to consumers and companies of all sizes in 111 countries, on six continents. The company's commercial product range helps fleet operators ensure driver and passenger safety, reduce fleet running and fuel costs, comply with industry regulations, and track and protect vehicles and drivers. Commercial customers include Parmalat, Schlumberger, Chevron, Greyhound, Spar, and Scania. MiX Telematics has offices in South Africa, the United Kingdom, North America, Australia, the United Arab Emirates, Qatar, and Uganda and works via an extensive global distribution network.

ABOUT INTELLICHAIN

Intellichain, founded in South Africa in 2005, specialises in the development of intelligent software solutions for fleet management and supply chain execution. Their modular offerings are extensive, assisting customers with network optimisation, hardware and software performance, and technological integration between multiple supply chain systems and processes. With an in-depth understanding of supply chain operations and a flexible business model, Intellichain provides highly customised and accessible solutions for all types of supply chain businesses. For a number of blue chip companies, Intellichain has enabled real-time visibility of revenue generation and robust control over all supply chain costs, resulting in significant performance improvement.

INTEGRATED TRANSPORT MANAGEMENT

The Integrated Transport Management solution, developed by Intellichain and MiX Telematics, provides commercial fleet operators with an end-to-end solution that optimises fleet performance. Incorporating key elements that include revenue management and integrated reporting, customers can benefit from robust control over their supply chain costs and streamlined processes, among numerous other benefits. The solution provides key integration expertise, enabling automatic flow between hardware and software systems which result in the generation of value from fleet data, and ultimately, better business decisions.

Forward-thinking companies are the first to invest in the capacity of their systems and maintain supply chain excellence as a key element in overall strategy.

OVERVIEW

As commercial fleet operators increasingly use their supply chain to compete and gain market share, technology and process upgrades are becoming more apparent. Forward-thinking companies are the first to invest in the capacity of their systems and maintain supply chain excellence as a key element in overall strategy.

To assist companies in optimising the performance of their fleets, Intellichain and MiX Telematics have merged their offerings to provide an integrated solution. The modular offering combines hardware and software features that enable highly effective transport management, from revenue planning and transport execution, to fuel management, maintenance management, and financial control throughout the supply chain.

The Integrated Transport Management solution allows fleet operators to manage their fleets in real-time, equipping them with a single view across their operation. The solution can be configured to manage different transport environments, addressing the unique requirements of each.

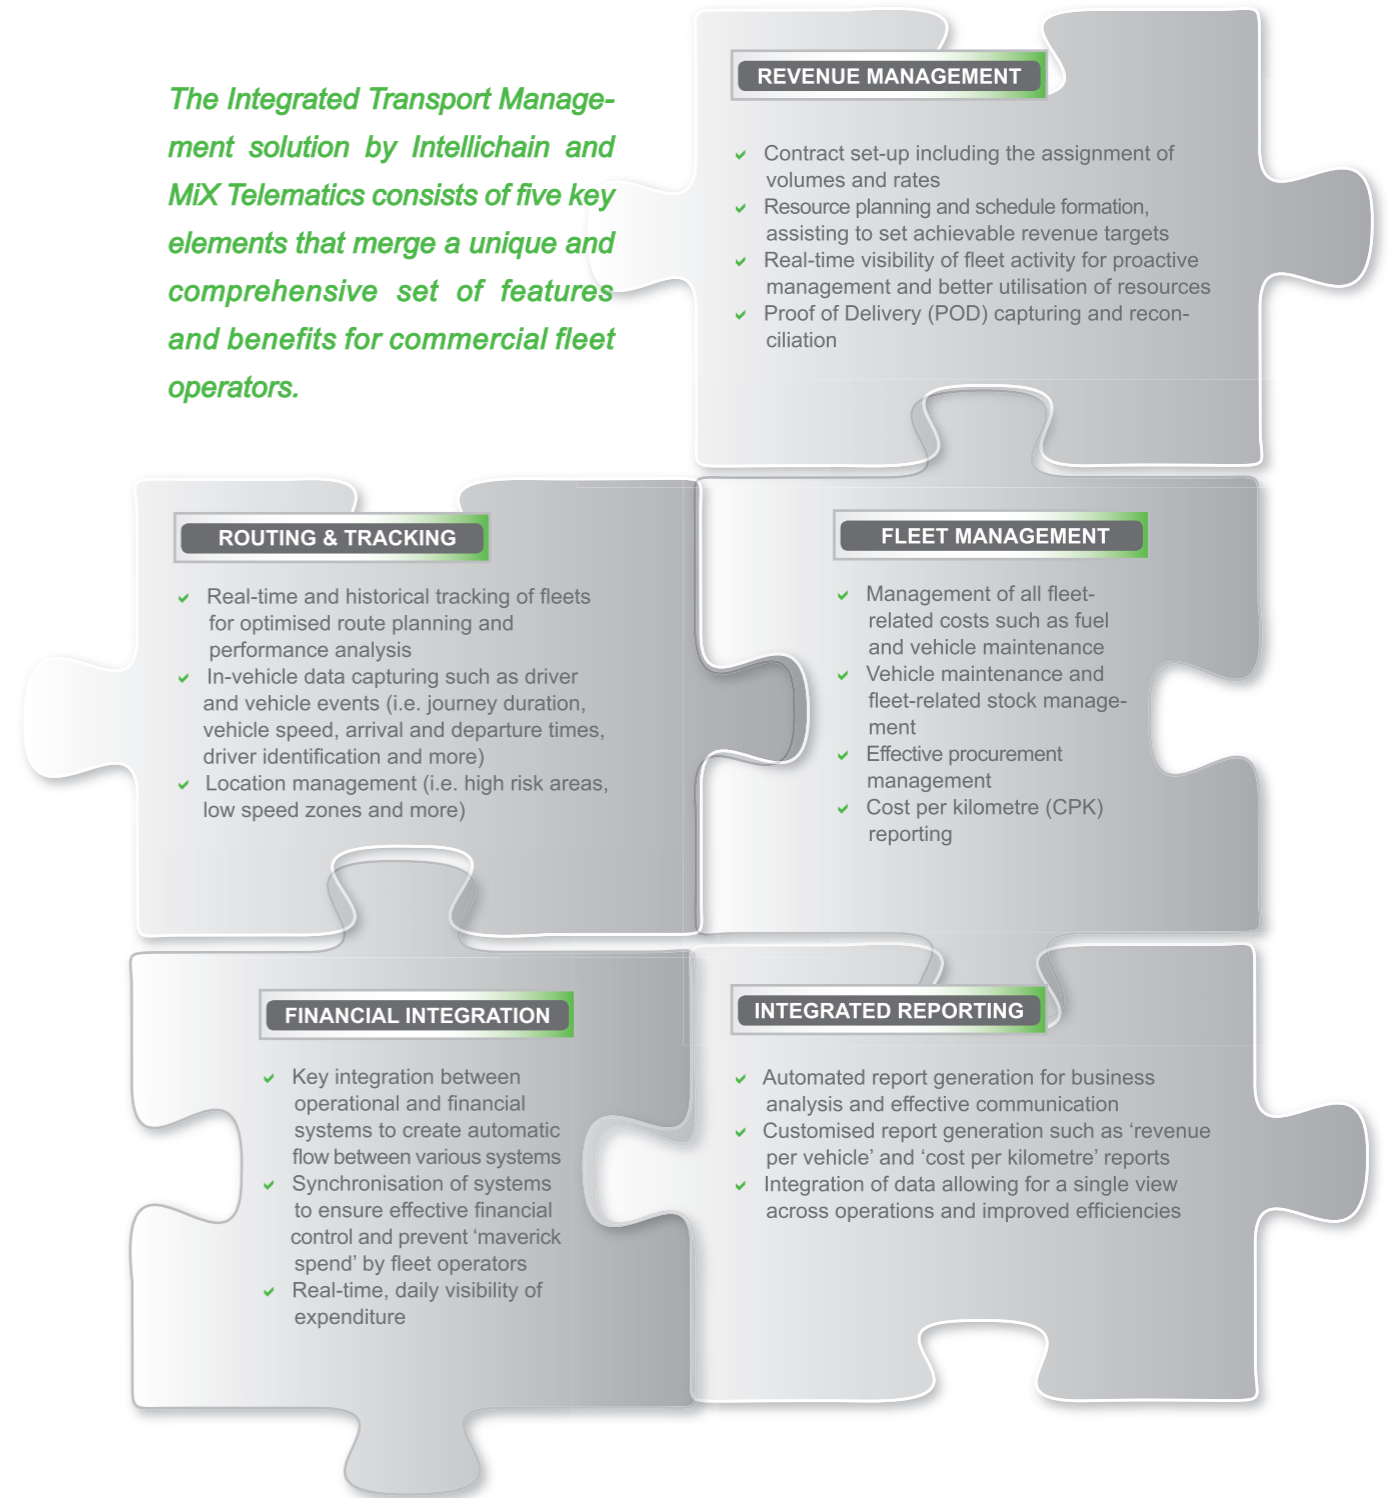

VALUE PROPOSITION

The Integrated Transport Management solution was developed based on Intellichain's in-depth knowledge of supply chain operations and MiX Telematics' leading fleet management expertise.

The integration translates into an array of benefits for commercial fleet operators, all supported by the following overriding advantages:

- ✓ Real-time visibility of revenue generation
- ✓ Robust control over all supply chain costs
- ✓ Web-based hosting, meaning there is no need for the investment in IT infrastructure
- ✓ Data and information security
- ✓ 24-hour access to fleet-related information and reports
- ✓ Flexible implementation based on a modular offering and specific customer requirements
- ✓ Negotiable payment plans

The Integrated Transport Management solution by Intellichain and MiX Telematics consists of five key elements that merge a unique and comprehensive set of features and benefits for commercial fleet operators.

“This comprehensive and tailored transport solution combines unique features that are proven to help customers reduce their fuel spend, better manage road risk and optimise the utilisation of fleet-related resources.”
Gert Pretorius - Managing Director
MiX Telematics Enterprise

“The Integrated Transport Management solution equips customers with new insights on fleet performance by generating more value from operational data, and providing customers with a single view across their operation.”
Willem Cilliers - Managing Director
Intellichain
