

Get e-logbook

Randfontein/ Westonaria — The announcement by Minister of Finance, Trevor Manuel earlier this year that as from the next tax year anyone claiming a travel allowance needs to present a detailed logbook, has placed many South Africans in a tailspin.

The good news, from one of the country's leading tracking companies, Matrix Vehicle Tracking, is that users of their Matrix Vehicle Tracking MX3 unit can literally toss away their manual logbook and step into the user-friendly, electronic era of the Matrix Vehicle Tracking MX3 logbook feature.

The unit has the ability to automatically generate a logbook and once set-up, through the Matrix Vehicle Tracking website, a logbook can be generated that will contain the date, location and distance per trip, which can then automatically with the remote, be identified as a business or private trip.

Hannelie Snow, Communications Officer for Matrix Vehicle Tracking, says the logbook feature is ideal for every sales representative or company employee that uses a vehicle during work hours. "What could be easier than generating an electronic logbook at the push of a button as you drive?" says Snow.
