

# THE BUZZ

Your neighbourhood hot list for May!

## LG wine cooler...

LG has just launched two fabulous free-standing wine coolers with a trendy aluminium titanium trim. With two different models available, the GR-W061FTH and GR-W101FTH, each is fitted with sensors that are able to determine the ambient temperature of the room it is in and then cool the beverages accordingly. A constant cooling feature means that the wine cooler will sustain its temperature consistently instead of switching on and off to maintain the desire temperature. Other features include a tinted ITO glass door for UV resistance, interior light with LED lamp and a modern appearance that will enhance any area of your home. Contact 011-772 1029.

## Happy Mother's Day from Woolies...

It should come as no surprise that Woolies' would be a good bet for a Mother's Day pressie come May 10, but this year there are a couple of special somethings that are irresistible, whatever your budget. We love the wire hearts filled with nougat or Turkish Delight. They are produced by a community-based group of previously unemployed township residents. And its sustainable too – once the sweets have been devoured, you can plant a seedling in the heart using the coconut husk provided. There's also cookbooks, flowers, chocolates and even choc-dipped fortune cookies.

## New service from ACSA...

Departures or arrivals, national or international flights, across all airlines. Get real-time flight info on your mobile! SMS your flight number to 36842. SMS cost R5.

## Avoid the last minute tax rush with an automatically generated logbook...

Good news for tax payers from one of the country's leading tracking companies, Matrix Vehicle Tracking, is that users of their Matrix Vehicle Tracking MX3 unit can literally toss away their manual logbook and step into the user-friendly, electronic era of the Matrix Vehicle Tracking MX3 logbook feature.

The unit has the ability to automatically generate a logbook and once set-up, through the Matrix Vehicle Tracking website, a logbook can be generated that will contain the date, location and distance per trip, which can then automatically with the remote, be identified as a business or private trip. Users have the option to choose which months they want to claim for from their employee and the receiver of revenue and its set up is so simple it can save drivers hours of paperwork and calculations at the end of the tax year.

Not only can the feature help track kilometres but it also keeps the driver up-to-date on servicing their vehicle. Amongst Matrix Vehicle Tracking MX3's assortment of features including the Crash Alert, Roadside Assistance, NoGo Zones and GeoLoc, is the unique Service Notification feature. Here again, with the Service Notification feature. Visit [www.matrix.co.za](http://www.matrix.co.za).
