

There's no substitute for experience

Car Air and Audio, proudly owned by Paul Chilvers, has been operating in the Vereeniging area for 20 years. The company specialises in car air conditioning installations and repairs, vehicle tracking systems, alarms, immobilisers, gear locks, cruise control, central locking, audio and more.

Due to Chilvers' team's extensive knowledge and experience within the vehicle air conditioning field, becoming a Behr Hella Service Partner was a natural choice. As a Behr Hella Service Partner the company has access to the ultra efficient 'Rapid Trade System', which is an online ordering system and catalogue, ensuring quick turnaround times when ordering any parts.

Since partnering with Behr Hella about two years ago, Chilvers has been consistently impressed with the speed and efficiency of the delivery system that ensures his clients are

kept waiting for the minimum amount of time.

Additionally, Car Air and Audio is a registered 'Vesa' (Vehicle Security Association of South Africa) member and performs security installations to suit the requirements of all insurance companies. The company is an authorised sales and installation centre for 'Matrix' vehicle tracking, as well as the inspection and installation centre for Outsurance. All security systems installed, in particular 'Autowatch', are of a high quality and carry a two-year warranty.

It is this pursuit of customer satisfaction and dedication to customer security that forms the core of Car Air & Audio's motto of 'Quality workmanship'.
