VEHICLE TRACKING

*Our customers are **PEOPLE**, not vehicles*

Welcome to the affordable way to achieve total driving peace-of-mind. Combining the latest technology in vehicle tracking and self-managed vehicle security, XDRIVE allows you to self-manage and monitor your private or business vehicles, helping to keep those that are close to you safe!

Designed to suit your individual lifestyle and pocket, XDRIVE provides value all of the time...not only when your vehicle is stolen.

Get connected to a safer and better lifestyle.

Do you want to...

Self-manage and protect your drivers, vehicles and content?

XDRIVE's accurate satellite positioning (GPS) and extensive wireless data communication coverage (GPRS/GSM) keep you informed as to your vehicles' location. Sophisticated security sensors detect theft or tampering. You and specified recipients are immediately notified by SMS or e-mail when set events are triggered, such as alert button pressed, low vehicle battery, over speeding, entry into no-go areas and out of hours driving.

Increase your business' efficiency and customer service?

XDRIVE can track your vehicles' exact whereabouts in real-time. Know which vehicle is closest to a customer to improve customer service and savings in travel costs. Drivers are deterred from moonlighting, ensuring your business runs efficiently and profitably.

Guarantee the safety of your loved ones on the road?

As a concerned employer, parent or family member you can keep track of those on the road, providing reassurance that they are driving responsibly or have arrived safely. Monitor their driving online or receive automatic SMS or e-mail notification when the remote alert button is pressed, or when potentially dangerous driving is detected.

And you want...

- an easy-to-use solution at an affordable price
- a pay-as-you-go price plan with an optional contract
- to pay only for services you use, when you use them
- a simple, non-intrusive installation

Then  **XDRIVE is your solution!**

A lifestyle product that provides all of the above, as well as other useful features and services designed to make driving more productive, safe and enjoyable.

Our customers are **PEOPLE**, not vehicles

Services at a glance...

Vehicle Tracking

See your vehicle's positions live using detailed online maps at any time. Our maps are fast, accurate and available as street-level or Google satellite maps, including terrain and hybrid views. Supply others with a personal guest user code, so they can track you.

Phone Locator

Request vehicle locations and status reports from your cell phone in real-time. Provide friends or family with your access code so they can monitor where you are by cell phone. You can change your access code at any time.

Automatic Event Notifications by SMS and E-mail

Activate only the events you want. Choose from alert button pressed, over speeding, vehicle battery low, out of hours driving, geofence violations, theft / tow-away detection and much more. SMS or e-mail notifications are sent to you and selected contacts as events occur.

Remote Control with Alert Button

The XDRIVE remote control activates various XDRIVE functions such as arming your vehicle, self-tests and voice mode selection. The remote control has a dedicated, childproof alert button that sends alert notifications to selected contacts if pressed.

Automatic Theft and Tow-away Detection

Built-in security sensors detect possible theft, tamper and tow-away occurrences. Immediate SMS or e-mail notifications are sent to your contacts list. Use the website or cell phone for live tracking of stolen vehicles.

Vehicle Movement Reports

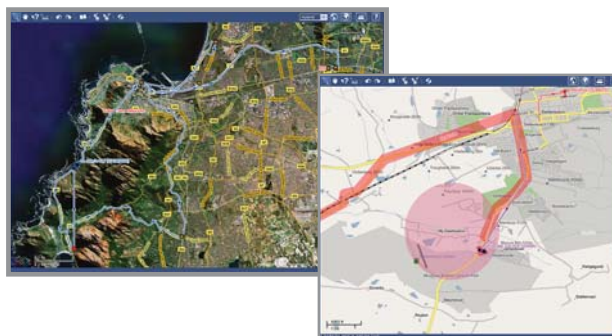

Replay historical trips with our detailed online maps or download trip information and review all vehicle movements in report form. Reports can be exported to Excel, PDF, Web, Tiff, CSV and XML formats.

Voice Prompts

Use voice prompts to assist with installation or provide driving commentary. Voice prompts warn drivers of over-speeding as it occurs, so the driver has the opportunity to adjust their driving before an over-speeding event is reported. Select one of three voice modes.

Self-Testing

Test your XDRIVE system at any time. Testing can be initiated using your remote control, cellular phone or via www.x-drive.co.za. Test results are available online and are sent via SMS and/or e-mail.

How it works...

Never has tracking your vehicles been this convenient or user-friendly. You can access vehicle information from any internet-enabled computer or cellular phone, from anywhere in the world. XDRIVE requires no special software; vehicles are tracked, managed and monitored on www.x-drive.co.za.

Track vehicles using detailed street-level online maps or Google's satellite maps. Powerful map tools offer a variety of useful functions. Search for street addresses and places of interest such as ATMs, hospitals and restaurants. Mark routes, highlight areas, set geofences, generate print-friendly maps and more.

Switch seamlessly from street-level to Google maps.

Select and customise **events** to send SMS or e-mail notifications to multiple recipients. Events include alert button pressed, over speeding, vehicle battery low, out of hours driving, geofence violations, theft and tow-away detection.

The position of your vehicle is recorded using GPS technology and XDRIVE uses the **GSM** cellular network to communicate vehicle positions to central servers on a regular basis. XDRIVE is built to the highest internationally acclaimed automotive quality standards at an ISO/TS 16949 and ISO 14000 approved manufacturing facility. XDRIVE is designed and manufactured in South Africa.

Making it easy & convenient...

XDRIVE requires no additional software to be installed into your computer. All you need is access to the internet. Reports and screens are easy to read, understand and use.

The latest available information is shown when you logon to www.x-drive.co.za. Select a specific vehicle or display multiple vehicles on a map and replay historical vehicle movements. XDRIVE is ideal for small fleets and families.

XDRIVE was designed with your **convenience and privacy** in mind. XDRIVE provides you with SMS messages via GSM and live data on our secure website. You will also receive e-mail notifications, trip reports and transactions.

Date	Start Time	Distance Driven	Start Time Speed	Stop Speed	End Time	Starting Time	Stoppage #
04 Jul 2007	07:25	167 km			08:36	08:36	0
	08:36	8.8 km			09:09	09:09	1
	09:09	7.8 km			09:49	09:49	2
	09:49	45.7 km			10:36	10:36	3
Totals for Jul 2007:		239.3 km					6
Totals for Jul 2008:		229.9 km					6

XDRIVE offers a pay-as-you-go price plan, so you don't pay for what you don't use. A contract option with **pay-as-you-go pricing** is available. For a small monthly fee, you receive free vehicle positions and 600 XDRIVE credits. XDRIVE credits are deducted for various services. You can purchase XDRIVE credits online.
